

CONTINUOUS POLY BAG MACHINE

servo X 5-15/servo X 800
THE MODULAR
HIGH-END ALL-ROUNDER

servo X 5-15 servo X 800

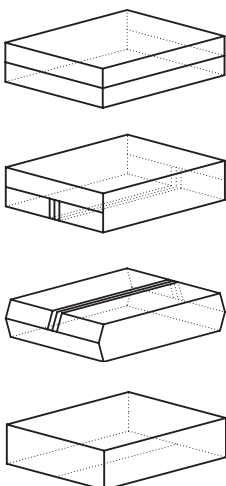

These machines cover the broadest possible range of horizontal film packaging applications – from business card through to windscreen – and they still have maximum modularity. The machines can be configured individually and thus meet all requirements.

The servo X 800 is the most flexible and powerful of machines in the large-format segment.

Whether chain infeed or infeed conveyor, the machines win over with their continuous packaging process and no stop-and-go, meaning dead time is not an issue when sealing. Besides high performance, this enables extremely tight-fitting and precise packaging with a saving in film of up to 15 %. This ensures that the film packaging's excellent appearance is unrivalled.

HIGHLIGHTS

- Minimum product spacing for maximum film saving thanks to precision synchronisation of the transverse sealing unit and product
- Siemens TIA Portal and free remote service with Hugo Beck
- Easy line integration and connectivity with higher-level systems, Industry 4.0 Ready
- Smart user guidance via CoPilot and touch screen
- Optimum film feed for processing the most diverse of film types and grades
- Maximum serviceability and maintainability thanks to perfect access and numerous maintenance-free components

TECHNICAL DATA

Product infeed	manual as standalone/automatic in line
Film	PE, PO, PP, biofilms, centre-folded film and flat film
Product size	servo X 5/8/10/12/15: L: from 45 mm, W: 10 – 450 mm, H: max. 250 mm servo X 800: L: from 150 mm, W: 150 – 800 mm, H: max. 450 mm
Operation	continuous
Capacity	servo X 5/8/10/12/15: Five performance classes up to 15,000 cycles/h servo X 800: up to 8,000 cycles/h
Version	Cut sealing lateral or on bottom, overlap sealing on top, bottom overlap with or without sealing/ionisation
